The First All-America Gladiolus Releases

APPLEBLOSSOM

Plant Patent No.: Patent Applied for
Year of Introduction: 1956

Co-origiators: Ralph Baerman, Carl Fischer
Show Classification: 460

A gladiolus of the utmost delicacy of coloring, the predominating hue being snowy white with a faint touch of cream in the throat and an exquisite flush of corona or cool rose pink at the edges of the petals. Up to eight or ten trimly tailored florets, about five inches in diameter and of very heavy substance, are open at a time on spikes up to five feet tall. A vigorous, easy grower that performs excellently with only average culture. Appleblossom will give you a new conception of gladiolus beauty when it blooms in your garden.
